

Cathy and Mike Ellis, owners of Senior Care Options, elected to be individually trained and certified by State of California with Residential Care for the Elderly (RCFE) Administrator Certificates – Cathy's RCFE Administrator Certification 1992 - 2025

There are various types of training and certification used by senior consultants and agents. Based on extensive experience as RCFE administrator, and knowledge of the importance of pertinent approved training, Cathy and Mike chose to receive approved education and certification by the state.

This specific approved training and certification, which is the same as that used by Executive Directors of Assisted Living properties, is not typically held by senior referral sources or placement agents. **We believe that professional development typically associated with RCFE administrators helps us to provide a higher level of current, informed advice for our clients.**

Cathy's and Mike's training has included many state-approved continuing education updates over the years, including:

Laws and Regulations updates	Dementia Essentials
Care Quality and Outcomes Measurement	Dementia Medications
Dining with Dignity	Communications with Dementia
Residents Bill of Rights	Medication Basics
Respecting Individuals and Diversity	Congestive Heart Failure
Stroke, Parkinson's and Dementia Care	Urinary Tract Infections
Alzheimer's Disease Research	

and many other pertinent classes that affect quality of senior care and living in Assisted Living properties.
